

DRIVE is the complete solution to reducing the number of uninsured motorists operating on roadways across the nation. Using the components listed below, **DRIVE** can accurately identify those who are uninsured and give them the opportunity to resolve their insurance status. In addition, **DRIVE** can then report lingering offenders to their respective state for further action.

DRIVE Features

- Insurance Data Matching
- Event-Based Verification Procedures
- Large-Scale Database Construction and Administration
- Ongoing Verification Programs
- Web-Based Verification Programs
- Call Center Services
- Correspondence Processing
- Customized Reporting

COMPLETE SOLUTION

Using a combination of proactive and reactive approaches to insurance verification, **DRIVE** helps state agencies reduce the amount of uninsured motorists. The system **IDENTIFIES** uninsured motorists and mails notifications to the registered vehicle owner; **CONFIRMS** whether the vehicle has been insured, sold or is actually registered to another driver; and **REPORTS** uninsured vehicles and drivers allowing state agencies to be more efficient in enforcing laws and regulations regarding uninsured motorists.

UNIQUE SOLUTION

DRIVE offers unique features to increase productivity and provide secure and efficient services. The **DRIVE** team oversees the entire process—from the beginning of the project through ongoing maintenance and support. The following list of unique features can be combined and customized to fit the needs of individual state programs.

- Insurance Data Collection & Maintenance
- Registration to Insurance Matching
- Driver's License Matching

- High Volume, Rapid Queries
- Professional Customer Service
- PMBOK Project Management & Monitoring
- Secure System Hosting
- Unique & Proven Business Model
- Secure Web Services
- Detailed System Reporting
- Help Desk Services
- Unparalleled Matching Accuracy Rates
- Ongoing Verification
- Public Information Campaigns

SMART SOLUTION

The **DRIVE** team has extensive experience in insurance data matching—processing millions of inquiries quickly and accurately—and implementing insurance verification programs across the nation. Our ability to meet industry standards and to employ cutting-edge technologies allows states to seek less obtrusive and more efficient ways to enforce financial responsibility laws.

SECURE—Protects insurer, state agency and driver information while maintaining measures to prevent security and confidentiality breaches.

MEASURABLE—Provides full audit trails of all transactions and reports of all system metrics.

ACCURATE—Provides trustworthy responses to inquiries and prevents needless correspondence from being sent to drivers.

RELIABLE—Uses the most successful ongoing verification process software and maintains successful processing of massive quantities of records.

TIMELY—Honors data exchange between insurers and state agencies while completing inquiries within users' expected time frames.

SUMMARY

DRIVE is the most technologically-advanced system in the nation to combat the problem of uninsured motorists. For more information, please fill out the contact form on www.hdisolutions.com and one of our team members will reach out to discuss how HDI can meet your agency's needs.
